THE SCIENCE OF
FORGIVENESS

Going... Going... Gone!

When God forgives us, He takes our sins far, far away. In fact, the Bible tells us in **Psalms 103:12**, "*He has taken our sins as far away from us as the east is from the west.*"

That means that God forgives us completely! Check out this cool science experiment that shows us exactly what this verse is all about!

Materials:

**1. Ground
Black
Pepper**

2. A Plate

3. Water

**4. Dish
Soap**

Directions:

Pour some water into the plate. Sprinkle a bit of pepper all over the water (this represents our sin – the things we do that are not what God would want us to do). Dip your finger into some dish soap (this represents God's forgiveness), and then into the pepper water. The pepper will "magically" spread out, away from the soap (When we tell God we're sorry, He takes our sin far away from us, and He forgives us completely. He gives us a restart). Note: the less pepper you use, the more easily it will spread to the sides.
